

# CSS3 Specialist Lab 5

Andrew Snyder-Spak  
LearnToProgram.TV

For this fifth lab, you will be writing CSS code to style the different span (<span>), image (<img>), and paragraph (<p>) tags in the HTML file at the bottom of this form. You should style your site in the following ways:

1. Using the “display” property, make it so that “s3” appears on it’s own line.
2. Paragraphs, “p1” and “p2”, should appear on the same line right next to each other.
3. The “img1” image should have a fixed position that is 200px from the left and 300px from the top. The image should stay fixed in place on the screen as you scroll down.
4. The “img2” image should have an absolute position that is 500px from the top, floating in front of the text.
5. The “img1” image should appear to be behind the other text when you scroll down.

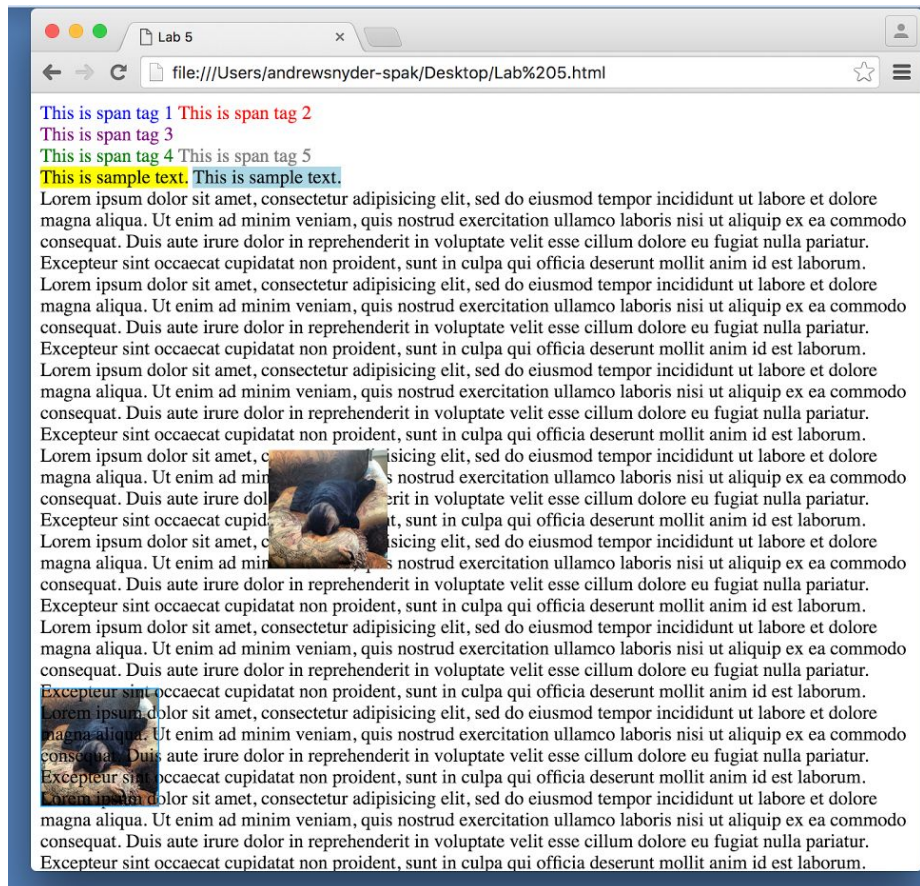

## NOTES:

-You may add your CSS code to your HTML with whichever method or methods you prefer. (External CSS, Internal CSS, Inline CSS)

-You can use whatever image files you would like, but make sure you change the file names in the HTML. Where it has “IMAGE.jpg” should be changed to the name of the image file you want to use.

-If you get stuck, feel free to go back and rewatch the video lectures. If you really can’t solve your issues, don’t worry because the next video will be the “Lab 5 Solution Video” where I will go over one possible solution line by line so that you can see where you made your mistake.

When viewed in the web browser, your completed Lab 5 should look similar to the screenshot below:

## HTML CODE:

```
<!DOCTYPE html>
<html>
<head>
  <title>Lab 5</title>

</head>

<body>
```
