

Activity 2.6: Restaurant Reviews Page

Now that you're familiar with a few HTML5 tags, let's create a page with some more meaning. If you're not familiar with many restaurants, do a Google search and find some restaurants in your area.

1. Open your text editor and create a new document.

2. Immediately save that document as activity2.6.html. Make sure you save it somewhere easy to find so you don't have to search for the file later. Saving your document now will turn on the code highlighting feature of the text editor.

3. In the document, on the first line type the doctype declaration as shown below:

```
<!DOCTYPE html>
```

You'll remember that this simple declares that we are writing an HTML5 document.

4. Continue with the rest of the basic document structure. You'll want to begin keying in this code block directly below the doctype declaration.

```
<html>
  <head>
    <title>Activity 2</title>
  </head>
  <body>

    </body>
</html>
```

5. After the opening body tag, add an <h1> tag with the content "My Restaurant Reviews". The entire line of code should appear like this:

```
<h1>My Restaurant Reviews</h1>
```

6. You're going to add two restaurant reviews to the the page using <h2>, <h3>, <p> tags and an unordered list. You can review any restaurants you would like, however, you want your output to appear in the browser similar to the screenshot below.

The Smithy

171 Main Street
Monroe, CT

The Review

The Smithy has served area residents for over 30 years. The restaurant offers a full bar, and specializes in grilled steak and seafood. A salad bar is offered as well.

Smithy Favorites

- Filet Mignon
- Loin Lambchops
- New York Strip
- Shrimp Cocktail

Black Duck Cafe

605 Riverside Avenue
Westport, CT

The Review

A local favorite, the Black Duck has been serving seafood, burgers and classic fare for decades. The riverside restaurant is located in an 1840's era barge.

Smithy Favorites

- Broiled Salmon
- Flat Iron Steak
- Stuffed Burgers
- Full Belly Clams

Note the formatting and line spacing carefully and attempt to emulate the screenshot exactly.
